

## Initial training

The initial training is 5 weeks. The first two weeks takes place in our training center with an experienced trainer. We can train up to 4 people at once, so it pays to book early.

Before start up the franchisee receives:

- Assistance in establishing a van lease
- Complete equipment, cabinetry and start up supplies installed in franchisee van
- Promotion materials: uniform, business cards, invoices, van signage  
One week training in a corporate training environment
- Detailed business planning for a quick start
  
- A detailed Confidential Franchise Operating Manual, with the following sections: Introduction; Safety; Marketing ;  
Paint Systems;  
Color Theory;  
Color Matching; Mixing;  
Application Techniques;  
Management & administration;  
Equipment ;  
and Glossary.

One of our requirements of the initial training is that you complete 50 jobs prior to doing any in your home territory.

The second 2 week period is set in the field with real jobs and a going concern operation.

The 5th week is with an experienced person in your home territory. We want you ready to go on your own when the initial 'training wheels' come off.
